Objective

A motivated and self-taught full-stack web developer seeking an internship opportunity to grow professionally. I aim to apply my skills in React, Node.js, MongoDB, and modern web technologies to contribute effectively and gain hands-on experience in a dynamic work environment.

Education

Completed High School

Currently focusing on building strong programming and software development skills through self-study and real-world projects.

Technical Skills

- Frontend: React.js, Tailwind CSS, Next.js, JavaScript
- Backend: Node.js, Express.js
- Database: MongoDB
- Version Control: Git & GitHub

Projects

- Real Estate App: A full-featured real estate platform built with the MERN stack.
- Online Complaints: A complaint management system using the MERN stack.
- Noty: A note-taking web application using MongoDB, Express, React, and Node.js.
- E-commerce Platform: An online shopping application with cart, authentication, and payment features using the MERN stack.

Experience

No formal work experience yet. Eager to gain practical exposure through internships and collaborative projects.
